## Intro

### MIWOK APP DESIGN BRAINSTORMING

**App description:** We want to create an app for someone to learn words in the Miwok language.  
**App content:** We have a collection of words that fall into 4 categories - **Numbers**, **Colors**, **Family Members**, and **Phrases**. We can create images and record sound files for all the words.

**Brainstorm** how we can present this information in a user interface for an app. You can sketch out the app if you want. **Think** about:

- How many screens should there be in the app?
- Would you group the words together or show each one individually?
- How should the user interact with the app?

**Write** some of your brainstorms here:

## Quiz: Intro

A collection of the words we would like to add to the app can be found here, [Miwok Words Dictionary](#)

Have questions? Head to the [forums](#) for discussion with the Udacity Community.
